TABLE OF CONTENTS

- DAY 3: Develop Soft Skills for the Workplace
- Introduction - Develop Soft Skills for the Workplace
- Lesson - Develop Soft Skills for the Workplace
- Conclusion - Develop Soft Skills for the Workplace
- Develop Soft Skills that Industry Demands
- DAY 4: Gain Guidance from Career Gurus
- DAY 5: Write a Winning Resume and Cover Letter
- Introduction - Write a

Report – Report can be typed or hand written for up to two pages.

There are three topics focused today. They are;

1.COMMUNICATION TO EXPRESS:

- Communication is an art of sending and receiving information.
- Communication can be classified as verbal and non-verbal.
- Non-verbal communication involves eye contact, paralanguage, facial expression, gestures and appearance.
- Effective communication happens when there is harmony between verbal and Non-verbal communication.

2.DELIVER PRESENTATION WITH IMPACT:

- Plan-based on audience, purpose, time frame and content.
- Prepare – presentation and proof read, prompt cards, visual aids.
- Practice – do a dry run, check time.
- Present – speak clearly and involve the audience.

3.DEVELOP SOFT SKILLS FOR WORKSPACE:

- Soft skills are important in maintaining healthy personal and professional relationships.
- A combination of hard and soft skills leads to career growth.
- Soft skills can be acquired by learning practicing and observing.

AFTERNOON SESSION DETAILS

Image of session

 The Python Mega Course: Build 10 Real World Applications

Create Integers, Strings, and Floats (E)

Create three variables `mood`, `strength`, and `rank` and assign a string to `mood`, a float to `strength`, and an integer to `rank`. The values you assign can be anything as long as they are of the correct type.

exercise.py
Hints
Solution.py

```
1 mood="10"  
2 strength=10.1  
3 rank=10
```

Line 3, Column 8 All changes saved

Reset code

Well done, your solution is correct!

Your progress ▾Share ⓘ

Create Tuple (E)

Create a `color_codes` variable and assign a tuple to it. The tuple should contain three tuples as items.

exercise.py
Hints
Solution.py

```
1 color_codes=((1,2,3),(4,5,6),(7,8,9))
```

Line 1, Column 1 All changes saved

Course content

- ✓ Coding Exercise 11: Create Tuple (E)
- ✓ Coding Exercise 12: Create Complex Dictionary (E)
- ✓ 21. How to Use Datatypes in the Real World? 1min
- ✓ 22. Did You Know? 1min
- ✓ 23. Summary: Integers, Floats, Lists, Dictionaries, Tuples, dir, help 1min

Section 4: The Basics: Operations with Data Types 0 / 18 | 18min

Section 5: The Basics: Functions and Conditionals 0 / 17 | 25min

Q&A

Notes

Announcements

Report – Report can be typed or hand written for up to two pages.

TOPICS LEARNT:

- Introduction to Python
- The basics: small programs
- Basics of data types, variables, integers, strings, floats, list types and range.
- Basics of Functions and conditionals
- Basics of processing user inputs

- Basics of loops
- Putting the pieces together: building a program
